SUMMARY

As a Python Django developer with 2+ years of experience, I have worked on complex systems that require attention to detail and problem-solving skills. I am skilled in creating web applications from scratch and have experience in all stages of the software development life cycle. My expertise in Python Django allows me to build robust, scalable, and efficient systems that meet user requirements. I have a strong understanding of database design and implementation, and I am experienced in integrating third-party APIs. Additionally, I have knowledge of front-end development with HTML, CSS, and JavaScript, and I am proficient in Git for version control.

EDUCATION

B.S. Computer Science

Minhaj University Lahore

2018 - 2022

GPA

3.05 / 4.0

EXPERIENCE

Senior Django Developer

Techflipp

2018 - Present Lahore, PK

As a Senior Django Developer at Techflipp, I am responsible for developing and maintaining a SaaS-based guest WiFi and vision module using Django and integrating hardware such as cameras and more into the Macro-Services platform. I am involved in all stages of the software development life cycle, from design and development to testing and deployment.

- Developing and maintaining a SaaS-based guest WiFi and vision module using Django.
- Integrating hardware such as cameras and other devices into the Macro-Services platform.
- Writing clean, maintainable, and scalable code that adheres to best practices, and integrating custom Microservices to write workflows and integrate ML model.

Full Stack Developer

20Services

09/2021 - 12/2021 Lahore, PK

As a Full Stack Developer at 20Services, I built and maintained gaming websites and dashboard using React.js and Django. In addition, I integrated third-party APIs seamlessly into existing codebase. I was responsible for developing both front-end and back-end website architecture and ensuring cross-platform optimization.

- Build and maintain gaming websites and dashboards using React.js and Django.
- Design and develop APIs.
- Integrated third-party APIs seamlessly into existing codebase.

Django and Flutter Developer

EwigLife

03/2021 - 08/2021 Phoenix, AZ

As a Full Stack Developer at EwigLife, I was responsible for developing and maintaining a recipe app dashboard using Flutter and Django, with a Firebase database. I was involved in all stages of the software development life cycle, from design and development to testing and deployment.

- Developed and maintained a recipe app dashboard using Flutter and Django, with a Firebase database.
- Worked with a team of developers, designers, and project managers to ensure the app met user requirements.

SKILLS

Programming & Framework

Python Django Flask C++ DRF

Celery Vue JS PHP

Databases & Servers

AWS Django ORM MySQL

PostgreSQL MongoDB Firebase

Development Tools

Git PyCharm Docker Asana

VS-Code Postman

AWARDS

Cisco Meraki Global Hackathon 2022

See All information for this Hackathon
